

## **Global Strategy For Plant Conservation**

### **A. Understanding and documenting plant diversity**

- Target 1:** Widely accessible census lists of all plant species, including fungi, found in native habitats in Ireland.
- Target 2:** A preliminary assessment of the conservation status of all known plant species, at national and regional level in Ireland.
- Target 3:** Development of models with protocols for plant conservation and sustainable use, based on research and practical experience

### **B. Conserving plant diversity**

- Target 4:** At least 10 per cent of each of the world's ecological regions effectively conserved
- Target 5:** Protection of 50 per cent of the most important areas for plant diversity assured
- Target 6:** At least 30 per cent of production lands managed consistent with the conservation of plant diversity
- Target 7:** 60 per cent of the world's threatened species conserved *in situ*.
- Target 8:** 60 per cent of threatened plant species in accessible *ex situ* collections, preferably in the country of origin, and 10 per cent of them included in recovery and restoration programmes
- Target 9:** 70 per cent of the genetic diversity of crops and other major socio-economically valuable plant species conserved, and associated indigenous and local knowledge maintained
- Target 10:** Management plans in place for at least 100 major alien species that threaten plants, plant communities and associated habitats and ecosystems

### **C. Using plant diversity sustainably**

- Target 11:** No species of wild flora endangered by international trade
- Target 12:** 30 per cent of plant-based products derived from sources that are sustainably managed
- Target 13:** The decline of plant resources, and associated indigenous and local knowledge innovations and practices that support sustainable livelihoods, local food security and health care halted.

### **D. Promoting education and awareness about plant diversity**

- Target 14:** The importance of plant diversity and the need for its conservation incorporated into communication, education and public awareness programmes.

### **E. Building capacity for the conservation of plant diversity**

- Target 15:** The number of trained people working with appropriate facilities in plant conservation increased, according to national needs, to achieve the targets of this Strategy.
- Target 16:** Network for plant conservation activities established in the country.
