

# *Stachys alpina* L.

Key:

**Dots** refer to the native sites of the species

**Numbers** refer to the nearby Botanical Collections

The species is now in the '**Parking List**' (Neophyte), and will not be listed as threatened in the next British Red Data Book.

## *Starting references*

### **Family**

Lamiaceae

### **IUCN category**

Endangered

### **Habit**

Herb (perennial).

### **Habitat**

Open woodlands, wood-borders, hedge banks and trackways.

### **Distribution in wild**

Country	Locality & Vice County	Sites (10km <sup>2</sup> occurrences)	Population (plants)
Wales	Denbighshire	1	~14 in 1994
England	near Wotton-under-Edge, S. Gloucestershire	1	small

## *Ex situ Collections*

### **Gardens close to the region of distribution of the species**

- 1 Treborth Botanic Garden
- 2 Bodnant
- 3 Portmeirion Gardens
- 4 Hidcote Manor Garden
- 5 Batsford Arboretum
- 6 Highgrove House
- 7 Westonbirt Arboretum
- 8 University of Bristol Botanic Garden
- 9 Bristol Zoo Gardens
- 10 Wildwalk At-Bristol
- 11 Congrove Cottage

### **Gardens with specialisation on family Lamiaceae or genus *Stachys***

None

### **Potential to grow the species in *ex situ* Collections**

Seeds don't immediately germinate after dry storage, but germination can be triggered by chilling, perforation of the seed integuments, or treatment with gibberelins, (British RDB, 1999).

## *Conservation information*

### **Linkages to BAPs**

### **Known conservation programmes**

Seed sowing and/or transplantation.

**Habitat Management**

Some populations occur in Wildlife Trusts sites, in both counties.
